Subject: AES

I will meet with Ruth Santiago in Puerto Rico on 6/21 to tour approximately 20 sites where she/citizens report Agremax (coal ash/lime aggregate from AES Guayama power plant) has been used/applied. I will also visit several such sites identified by CEPD, and plan to meet with the PR Environmental Quality Board and possibly the Department of Health to discuss drinking water well locations/data in proximity to these sites. I am currently preparing a GIS map of the known well locations and sites, which I will share with EQB.
